

*On-premises laundries face enough daily challenges, wrestling with complicated, inefficient equipment shouldn't be one of them. IPSO commercial manual control washers and dryers are the perfect solution for small on-premises laundry applications such as salons and veterinary clinics. These pieces also continue our goal of building equipment that's simple to own and even more simple to operate.*

## Simplifying Ownership

### Washer

**ENERGY EFFICIENT.** IPSO's 18 lb capacity Horizon<sup>®</sup> front load washer keeps water use to an ultra-low 13.9 gallons per cycle, which can help your laundry reduce expenses. In addition, the washer's low water use qualifies it as an ENERGY STAR<sup>®</sup> product.

**LOWER COSTS.** A one horsepower motor produces a 1000 RPM spin speed. This spins more water out of loads and keeps drying times and utility costs down, while increasing throughput.

**RUGGED RELIABILITY.** Durable commercial components and a high-quality shell ensure your laundry gets years of solid performance from your investment.

### Dryer

**TIME SAVINGS.** A large, 7.0 cu.ft. cylinder saves time by handling your largest loads and oversized items. Time savings continue with a door opening of 2.06 sq. ft., which aids fast loading and unloading.

**HIGHLY EFFICIENT.** IPSO's advanced blower system produces airflow of 220 cu.ft. per minute, making efficient use of the dryer's heated air and keeping drying times to a minimum.

### EASE OF OPERATION.

There's nothing complicated about IPSO's controls. Their intuitive operation translates into minimal, if any, training necessary for employees.

### Stack Washer/Dryer

IPSO's stack washer/dryer takes all the same features of the stand-alone washer and dryer and puts them in a space-saving package. The stack's versatile design allows it to be installed on any floor type.
